DETAILED ACTION

Election/Restrictions

Claims 1-2 were withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/25/05. Furthermore the examiner would like to note that since claims 5, 8 and 9 are dependent on claim 1 they would also fall under species 1 and therefore these claims are withdrawn from consideration.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 3 is rejected under 35 U.S.C. 102(b) as being anticipate by Siniaguine et al. Siniaguine et al. disclose bonding a supporting layer (310) to a first surface of a

semiconductor wafer on which a semiconductor element is formed; forming a groove in the semiconductor wafer by etching a second surface of the semiconductor wafer, the second surface being opposite to the first surface; and rounding a corner of the groove by etching the second surface (figures 9-11 and paragraphs 0043-0048).

Allowable Subject Matter

Claims 4, 6, 7, and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach or suggest wet etching to form the grooves and round the corners (claims 4, 6, 7, and 10).
